

Dates & Facts

EXCON - a strong brand

The EXCON Group is independent of large corporations, and owner-managed. At present, it comprises seven companies and affiliates in Germany, Austria and Switzerland, with four independent national companies in Belgium, Italy, Poland and Spain which are owned by our licence partners. The healthy and sustainable financial base is the backbone of the Group. We have been shareholder-financed and therefore independent of banks since 2013. In total, the EXCON Group has capital resources of over 9 million euros in shareholders' equity and loans. This puts us in a position to finance our organic and external corporate growth and to be a reliable and economically sound service partner to our clients – even in difficult market phases.
